

# Scheduled Maintenance

An Ascom Enterprise Solution for operational efficiency

Software interface on laptop screen showing a table of maintenance tasks:

Machine	Code	Location	Owner	Next Due	Staff Assigned	Last Checked	Status	Quality Check	Responsibility	Checked by	Comment
2101	KL1002	001	Yellow	10/20/2023	John Smith	10/18/2023	In Progress		John Smith	John Smith	
2102	KL1003	002	Blue	10/25/2023	Jane Doe	10/20/2023	Completed		Jane Doe	Jane Doe	

## Efficiency as planned

*Ascom's digitalized and mobile solution for planned preventive maintenance can boost overall equipment effectiveness and limit costly downtime.*

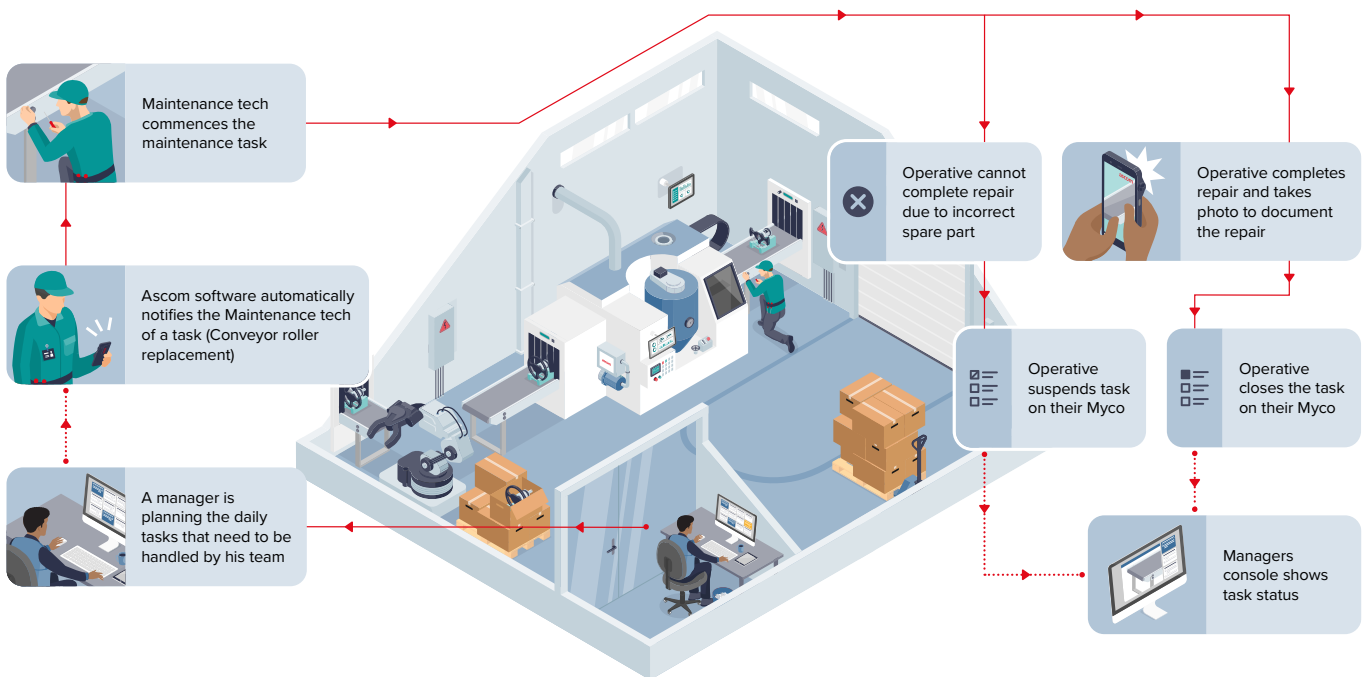

### Maintaining equipment and limiting downtime

Well-executed scheduled maintenance is vital in extending the life of operational equipment, optimizing performance and reducing the number of breakdowns. It is therefore essential that repairs and maintenance are carried out in a timely manner at the specified intervals by a skilled technician or engineer, with a record maintained for warranty and quality purposes.

All of which can become a challenge, especially when staff resources may be scarce.

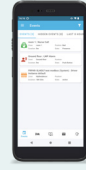

### Scheduled Maintenance solution

Ascom's solution lets you digitalize scheduled maintenance tasks to simplify maintenance processes. It allows tasks to be aggregated and distributed to a highly mobile workforce of maintenance staff, simplifying record-keeping, achieving the desired efficiency gains and limiting any downtime.

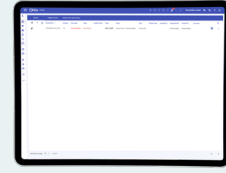

## Key features

The Scheduled Maintenance solution is based on 'built for environment' mobile devices, with scheduling software to drive dashboards, mapping and mobile response workflows, as well as ensuring maintenance tasks are timed, executed and recorded for efficiency and future analysis.

Mobile Alerting

List View of current alarms

- System that adapts to your way of working
- Open system via API and ability to connect to other systems
- Support for ad-hoc and scheduled tasks
- Supports Ascom IR location technology (in conjunction with Ascom Myco smartphones)
- Supports location services from third-party vendors (BLE/Wi-Fi) maximizing ROI of existing technology
- Configurable alarm dashboards — from simple list view to interactive map
- Enhanced logging and reporting of the complete trail in one view

## Software and licences

The solution is based on Ascom Ofelia enterprise alarm and workflow management software. Ofelia software enables you to integrate with third-party systems via Modbus, OPC-UA, ESPA, SIP, email, etc., while it is HTML5-enabled to allow user access from any PC or screen.

## Solution components

Mobile Devices	Item	Part No.
Smart Devices (incl. DECT variants)	Ascom Myco 3, Ascom Myco 4	SH2-XXXX, SH4-XXXX
Android Devices	3 <sup>rd</sup> Party Android Devices	N/A
Software	Item	Part No.
Task Management Kit	Tasks	OFL-TASKS-SK
Extension Licence	Messaging Users	OFL-USER-X
Extension Licence	3 <sup>rd</sup> party RTLS	OFL-GEO-EXT
Extension Licence	Input Drivers	OFL-ENTRY-DRV-X
