Workplace Safety

Guard Tour

Guard uses Ascom Myco in conjunction with location monitoring (BLE) to evidence check

Ascom software is fed the check-in and location information

Information goes to: Security at desk

The guard checks a prisoner in a cell and confirms he is safe and well

and dashboard on screen

A prison guard is required to perform a “round” to check on the welfare of each prisoner

All rounds are recorded and reports compiled as an evidential audit trail of completion
