

Workplace and staff safety

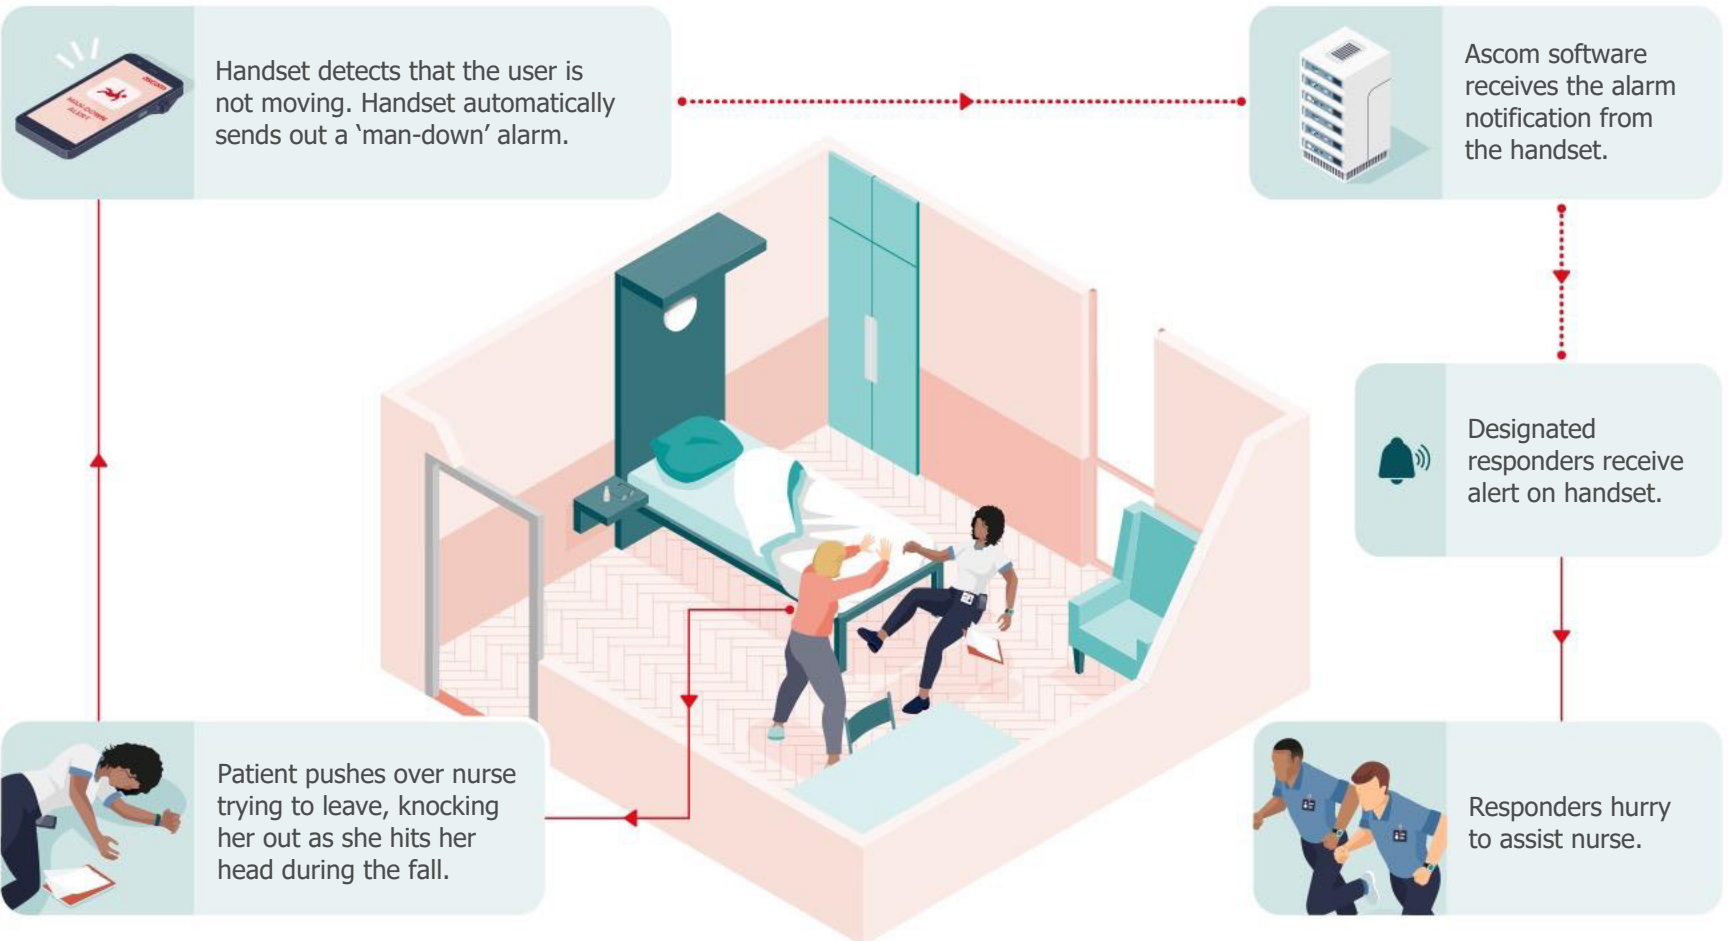

Man-down alarm after personal attack

Challenges

- In Germany, 70% of caregivers reported being physically attacked by patients in a year, and half of the reported cases occurred in a psychiatric facility⁽¹⁾
- Caregivers verbalize that assaults by patients have instilled fear and trauma in them. Most of assaults occurred when staff were performing their routine job functions (...)⁽²⁾

Benefits

- Allows prompt assistance in threatening situations and in case of injury
- Enables fast coordinated response directly to the staff member's exact location
- Helps staff members feel secure
