

Ascom Capital Provides Customers with Flexible Purchase Options

Healthcare operations and industries are facing disruption from many fronts, from changing reimbursement models to global tariffs and increasing operational costs. That's why Ascom created Ascom Capital. Ascom Capital helps organizations sustain technology investments that advance the metrics that matter most: quality, efficiency and safety.

Ascom Capital provides flexible, needs-based payment plans, consolidates system and service costs, supports liquidity for other priorities, and delivers dedicated project management throughout the entire project lifecycle.

With Ascom Capital, you can:

- Finance up to 100% of your project
- Access subscription plans that fit your needs
- Access competitive rates and flexible terms
- Support your cash flow planning
- Capture potential tax and account benefits
- Accelerate your ROI by minimizing upfront cash outlay

This program supports Ascom's integrated portfolio that brings together nurse call systems, intelligent software, and mobile devices to deliver comprehensive solutions for healthcare and other industries. Key capabilities include:

- Smart Nurse Call: Proven innovation for solutions that are scalable and interoperable with existing and/or systems and infrastructure to gather and filter data from multiple sources, including medical devices
- Staff Safety: One-touch alerts on Ascom mobile devices notify staff or security, with real-time location tracking for rapid response.

- Alarm Management: Advanced filtering ensures only actionable alarms are sent to designated staff, improving response times and operational efficiency.
- Predictive Analytics: smart integrations with infrastructure and equipment to monitor data, proactively alerting teams to potential issues and streamlining task distribution.
- Rounding: enables scheduling and tracking of rounds, providing detailed reporting on adherence and compliance.
