

# Mobility with confidence

Workflow solutions for critical operations

## Safeguard your people. Safeguard your productivity

*In demanding commercial environments, teams need instant access to the right people and critical information.*

*Ascom on-site communication solutions connect people, systems and equipment in near-real time—combining powerful software with rugged handsets built specifically for tough commercial environments.*

*The result: quicker responses, maximized productivity, safer operations.*

## Customizable enterprise-grade solutions

### Staff Safety

Protect vulnerable and lone workers with instant alarms and automatic detection of dangerous situations. Push-button alarms, man-down detection, accurate indoor/outdoor location and automatic escalation.

### IoT and Technical Alarms

Connect IoT devices, alarms and data flows within an open platform architecture. Real-time location, alarm dashboards, incident mapping and mobile workflows provide continuous visibility and ensure critical events are delivered to the right resource instantly.

### Mobility in hazardous environments

From ultra-reliable DECT-based systems to ruggedized ATEX-certified handsets for explosive and hazardous conditions, Ascom solutions work to keep you working in the most demanding environments.

## From data to action: how Ascom solutions work

### Connect your systems

We integrate alarms and operational data from your existing and third-party systems into a single and open platform, enabling seamless, standards-based data exchange across your infrastructure.

### Combine and deliver the right information

Data from multiple inputs is aggregated and orchestrated centrally. With rules-based logic, prioritization and filtering, only relevant information is delivered in real time to the right users, roles or devices.

### Ensure action is taken

Configurable workflows define how alarms and data drive actions. Acknowledgements, escalation paths and response tracking support timely, informed action in critical situations.

# Manufacturing

*Ascom solutions are trusted and deployed at manufacturing facilities worldwide—helping to maximize efficiency, meet deadlines and fulfill safety regulations.*

## Some top challenges—and how to overcome them

*Delays in communication quickly lead to downtime, safety risks and lost productivity.*

*From equipment alarms and maintenance issues to changing orders and safety incidents, every event demands fast, coordinated responses across people, systems and machines.*

*Our solutions keep your teams connected to each other and to critical information—so they can respond faster, collaborate effectively and keep production running.*

## Key benefits for manufacturing

### Optimize manufacturing performance

- Alert operators and maintenance teams instantly when issues occur
- Reduce unplanned downtime with faster fault identification and response
- Support continuous improvement through better visibility into operations

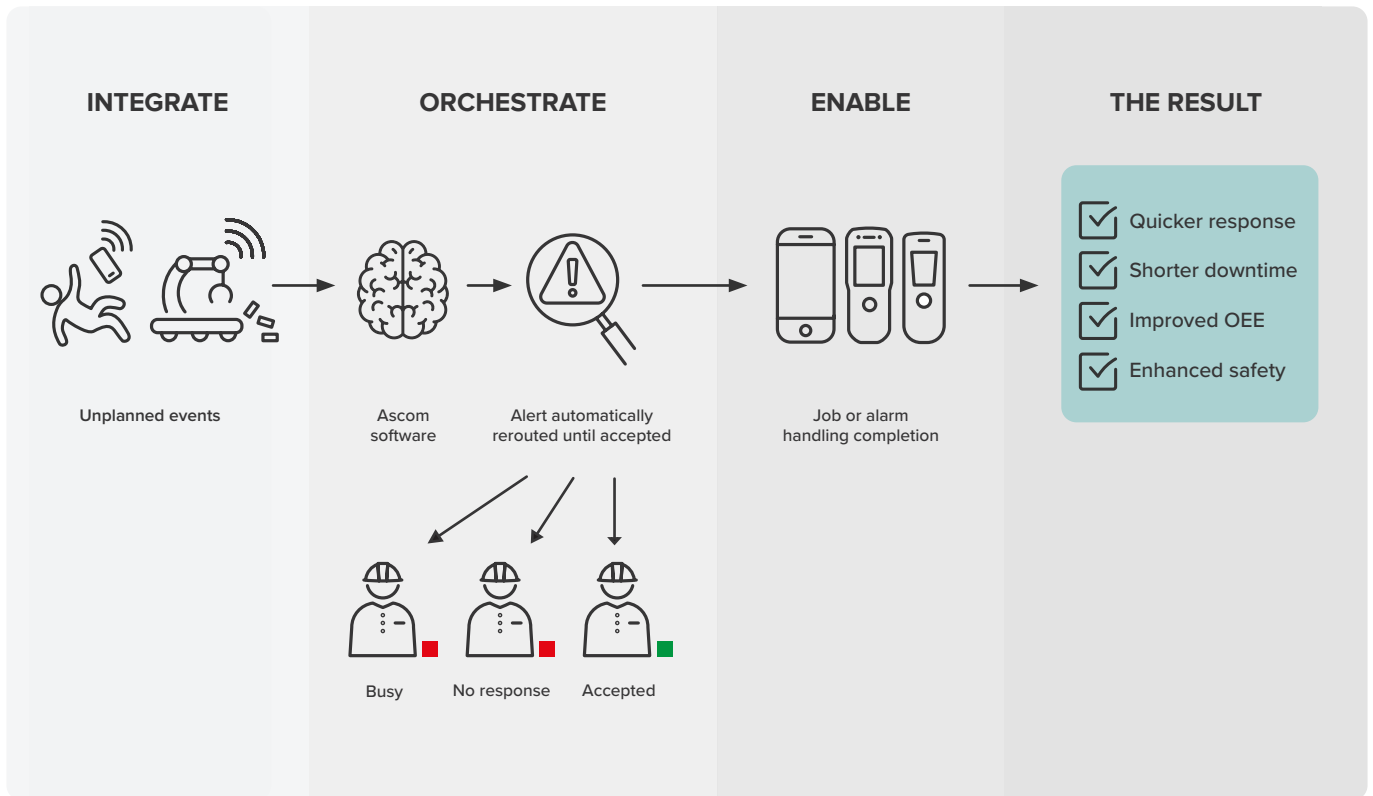

### Improve staff safety

- Support lone workers in maintenance, night shifts or restricted areas
- Enable instant communication during incidents on the factory floor
- Protect workers operating around heavy machinery and moving equipment

### Keep production teams aligned

- Coordinate operators, maintenance and supervisors across production lines
- Ensure smooth handovers between shifts with clear communication
- Keep teams synchronized to maintain throughput and quality

## How it works

## The features behind the benefits

### Stay on top of disturbances

- Monitor production lines to detect deviations and inefficiencies
- Receive alerts and instructions on rugged (ATEX-certified) devices built for tough environments and hazardous zones
- Access clear, contextual information to understand situations quickly

### Reach colleagues anywhere

- Support lone workers with push-button alarms
- Trigger automatic alerts if movement stops to ensure rapid assistance
- Provide location-aware alerts to respond quickly to on-site emergencies

### Collaborate across operations

- Share updates on orders, changeovers and process deviations in real time
- Gain immediate visibility into safety alerts and production changes
- Multiple options for support for mobile response workflows

### Pagers

Ascom pagers are the benchmark for rugged devices for demanding environments.

### DECT phones

Ascom handsets deliver that reliability in tough, uncompromising environments.

### VoWiFi phones

Scalable and standards-based, Voice-over-WiFi handsets that leverage your existing network infrastructure.

### Smartphones

Discover innovation, embrace connectivity. Commercial Android devices with barcode scanning, apps, and multi-network connectivity.

## Ready for mobility with confidence?

With more than 20,000 systems deployed across Europe and North America, Ascom helps organizations keep people, systems and information connected where it matters most.

We work with you to identify communication bottlenecks, integrate mobile solutions with your existing systems and ensure your teams receive critical information instantly. From deployment to long-term service, we support you every step of the way.

Our solutions are scalable, backward-compatible and built for demanding environments—with rugged mobile devices built for reliability and ease of use.

And the return on investment? Sometimes a single prevented incident can justify the entire solution. In other cases, the value lies in protecting people, safeguarding productivity and preventing costly disruptions.

#### About Ascom

*Our vision is a world where the right information moves people forward. Our mission is to put the right information in the right hands at the right time so that people can make the best possible decisions.*

*We are a global provider of communication and collaboration solutions for the acute care, long-term care and enterprise sectors. Our solutions are based on intelligent integrations with software and hardware that are open source and compatible with third party solutions. Every single second, our systems generate large amounts of data, which we then turn into useful and actionable information. This helps us to bring data to life for people in the toughest operational environments, ensuring smooth, complete, and efficient workflows.*

*Ascom is headquartered in Baar (Switzerland), has operating businesses in 19 countries and employs around 1,400 people worldwide. Ascom registered shares (ASCN) are listed on the SIX Swiss Exchange in Zurich.*
